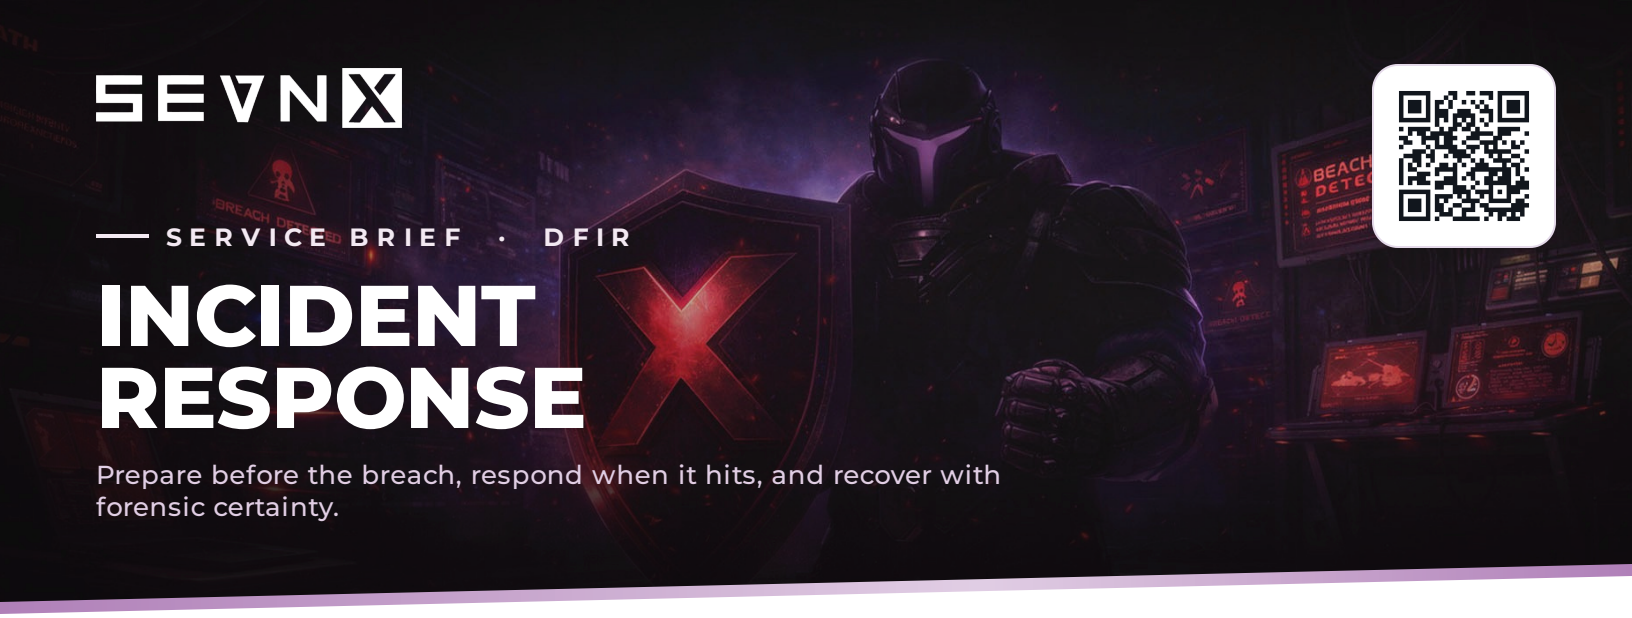
SEVN-X

SERVICE BRIEF · DFIR

INCIDENT RESPONSE



Prepare before the breach, respond when it hits, and recover with forensic certainty.

Incident response takes preparation before an incident, competent action when responding, and forensic investigation after. Most organizations have a plan sitting in a drawer that fails under pressure because it was never tested or updated for current scenarios. SEVN-X has you covered with actionable plans, 24x7 emergency response, and court-defensible forensics. **Our playbooks aren't theoretical; they come from breaches people experience.**

OUR IR SERVICES

IR Plan Review & Development

We evaluate or build custom IR plans with scenario playbooks for ransomware, BEC, and data breaches that your team can rely on under pressure.

24x7 Incident Command

Our incident responders provide immediate triage and tactical response, containing threats and guiding recovery, not just documenting it.

Digital Forensics

Forensically-sound investigation, conducted by GIAC-certified forensic analysts, of how adversaries got in and what they touched, backed by imaging, analysis, and court-defensible reporting.

Technology Deployment

We implement and tune detection and response tools so you can identify and contain threats faster, reduce dwell time, and limit damage.

WHY SEVN-X

SEVN-X regularly responds to real incidents virtually every week. Our IR plans aren't theoretical; they are informed by ransomware negotiations, forensic investigations, and breach containments. **When seconds matter, you need a team with a proven track record of success.**

- GIAC Certified (GCFA) analysts
- 24x7 emergency response
- Court-defensible forensics
