SEVN-X LLC.

681 Moore Road. Suite 101
King of Prussia, PA 19406

Date: 7.21.2026

TABLE OF CONTENTS

SEVN-X is a cybersecurity firm built by operators, not theorists. Our team blends elite offensive security experience with the rigor of enterprise-grade defense frameworks. We move fast, think like the adversary does, and deliver clarity amidst chaos.

Contents

“Only 42% of companies discover breaches through their own security teams.”

Source. IBM, 2023 cost of a Data Breach

On average, it takes companies 204 days to discover they’ve been hacked – and another 73 to contain it.

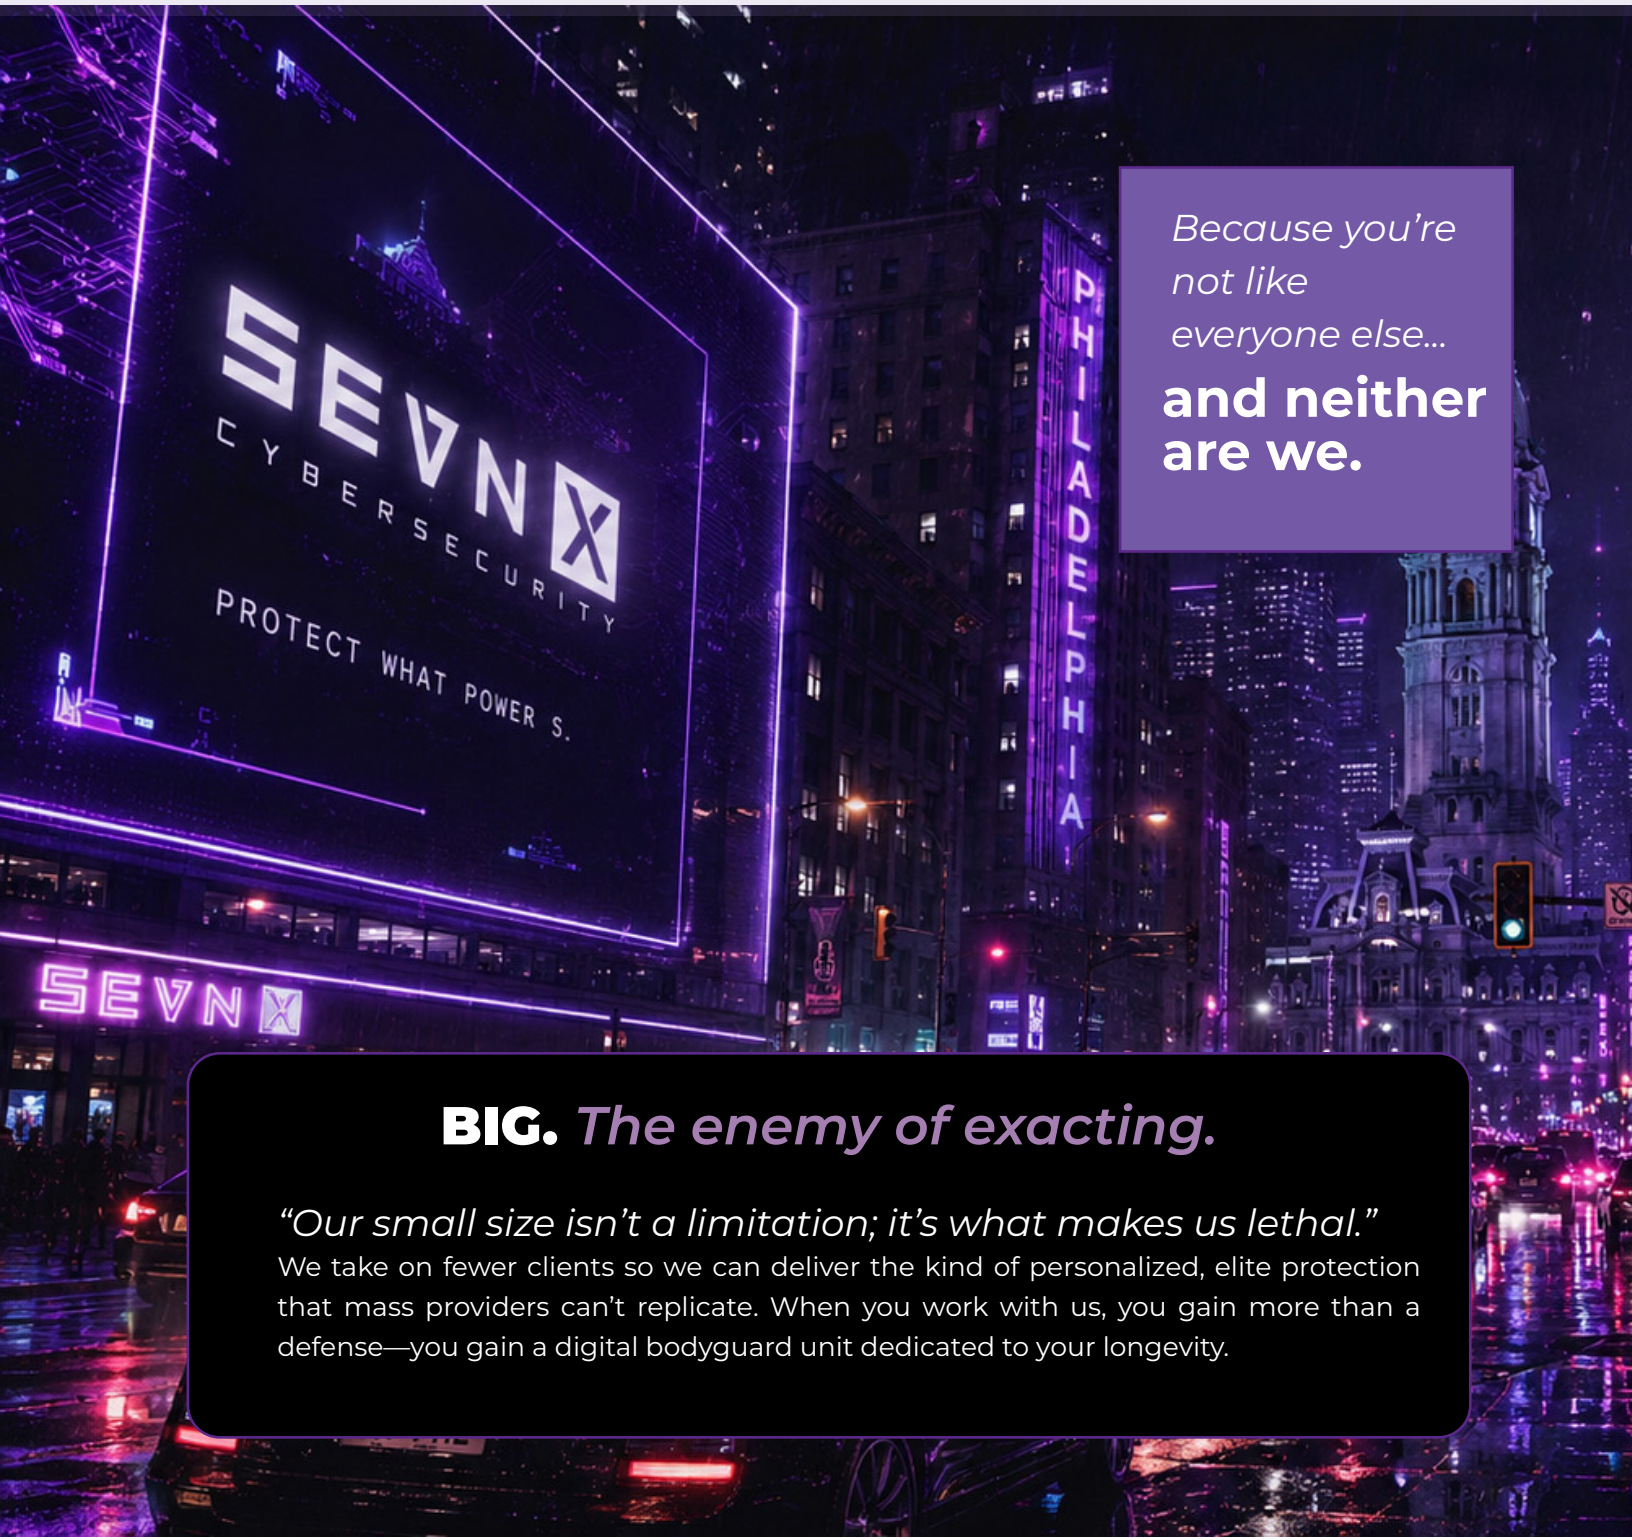
SEVN-X OFFERS IR RETAINER SERVICES

COMPREHENSIVE INCIDENT MANAGEMENT

++

COMPANY OVERVIEW

We are not an “add-on security” firm. We are an elite, boutique cybersecurity team: a select group of ethical hackers, engineers, and intelligence specialists who operate with precision, discretion, and intent.



Because you’re not like everyone else...

and neither are we.

BIG. *The enemy of exacting.*

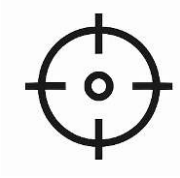
“Our small size isn’t a limitation; it’s what makes us lethal.”

We take on fewer clients so we can deliver the kind of personalized, elite protection that mass providers can’t replicate. When you work with us, you gain more than a defense—you gain a digital bodyguard unit dedicated to your longevity.

++

OUR VALUES

SEVN-X takes pride in being an elite cybersecurity firm composed of highly technical practitioners. No bait and switch junior talent being trained in your environment on your dime. All experts all the time. That's our secret.



PRECISION

Every engagement is executed with intention, discipline, and measurable impact. SEVN-X doesn't do "good enough." We pursue perfection in adversary operations, reporting, and client outcomes.

MINDSET

We don't simulate threats; we become them. SEVN-X approaches every test, investigation, and advisory engagement with the mindset of a real attacker: creative, adaptive, and quietly lethal in execution.

NO COMPROMISES

Integrity first and always. We owe our clients truth and transparency, even when uncomfortable.

CHAOS MANAGED

Innovation thrives on the edge of structure. We harness the creativity of hackers, the discipline of operators, and the composure of strategists.

++

FROM THE FOUNDERS

Since 2020, Matt Barnett and Co-founder Ryan Bradbury have enjoyed a perfectly balanced and symbiotic relationship. Matt is our dreamer and Ryan is our doer. Together, they form a powerful blend of the aspirational and achievable. Here's Matt on SEVN-X:

At SEVN-X, we were never interested in being just another cybersecurity firm.

We built this company to challenge the status quo; that is, to operate like the adversary, think like a strategist, and execute like a team that refuses to lose.

Cybersecurity today isn't about fear, it's about control. It's about understanding your environment better than anyone who could threaten it. It's about speed, precision, and intent. And that's where SEVN-X lives, at the intersection of technical mastery and real-world application.

We're small by design. Focused by necessity.

Every engagement is personal, every outcome measurable. Our clients trust us because we don't hide behind layers of management or buzzwords. We're operators, engineers, and analysts who believe excellence is earned not marketed.

If you're reading this, you already understand that resilience isn't a product, it's a mindset. Our job is to help you sharpen it.

Matt Barnett 007

CEO & Co-founder

> **Cybersecurity, just like most industries, ultimately boils down to the people at the controls.”**

What most businesses don’t realize is that our industry isn’t about finding and fixing every single vulnerability. It’s about building a holistic strategy that accounts for what’s important and reduces the *signal to noise* ratio. And that takes experienced professionals.

When we founded this team, I didn’t want another large firm built on sales quotas and generic reports. I wanted a precision unit, it works for the military doesn’t it? So we curated and still maintain a small, elite group of specialists who operate with the same military-like precision. Every member of our team was chosen not just for skill, but for mindset. We think differently. We anticipate. We treat your environment like it was ours.

And our size means we don’t chase hundreds of clients. We protect a select few: deeply, personally, and discreetly. That’s the luxury we offer: true and robust security programs for a chaotic world.

Ryan Bradbury

COO & Co-founder

HOW WE ENGAGE

Globally recognized. *SEVN-X partners with customers to navigate the complexity of safeguarding their systems and data. Supporting the customer journey, SEVN-X prepares or modernizes cybersecurity programs, assesses capabilities, and responds to emerging threats and cyber attacks.*

ASSESS

- Network & Application Penetration
- Application & Product Security
- Cloud Architecture Review
- Microsoft 365 Security Review
- Remote Workforce Assessments

- Breach Analysis And Mitigation
- Cybersecurity Remediation Support
- Forensic Analysis
- Deposition & Testifying

SEVN-X DELIVERABLES

At the end of the day, what matters is what we bring to the table... your table. You can get our services from plenty of other companies, but here's why you'll want to get them from us.

SECURITY FOR *YOUR* BUSINESS/ ACTIONABLE REPORTS

Your organizational goals should be bolstered by your security, not impeded. We focus on your operational goals before, during, and after an engagement, ensuring our work fits your world.

WHITE GLOVE

Communication. You'll know what we're doing and when. It's never hard to reach us either.
Flexibility. When things change, we roll with it.

EDUCATED TEAM

It's great when your team patches a vulnerability. It's better when they understand why, and how it impacts the business. We encourage onsite testing so that your team can interact directly with ours. We explain findings and help you understand not just WHAT is vulnerable, but WHY it matters and HOW to fix it.

> We aren’t paying for the penetration test, we’re paying for **the report.**”
>
> ***— IT Security Director***

EXECUTIVE SUMMARY

A high-level summary of the assessment’s purpose and results—packaged for executive delivery. Includes strategic recommendations to support and enable executives in making decisions.

FINDINGS

Overview: A snapshot of all the assessment’s findings—categorized, prioritized, and ranked by both criticality and estimated remediation effort.

Breakdown: Each finding in detail with a description of the risk, its potential impact, and remediation guidance to assist your IT team in eliminating or mitigating the issue. When applicable, screen captures and steps to reproduce the issue are documented.

APPENDICES

Cyber Kill Chains with step-by-step walkthroughs of the attack paths leveraged by SEVN-X.

Detailed summaries, processes, and results including images, statistics, tools, and techniques used.
Formatted and analyzed output of vulnerability scans, port scans, and other results.

Appendices will vary based on tactics & components included in the engagement.

++

CUSTOMER EXPERIENCE

We talk a big game about being selective with our customers, results driven, and obsessed with customer service and satisfaction; but, why not hear directly from those we've engaged with over the years:

“The SEVN-X approach to penetration testing is unlike anything I have encountered in the past. Their innovative approach and deep skillsets not only reveal technology problems but also uncover people- and process-related problems. I consider our company more secure having partnered with SEVN-X.”

- Global Healthcare Company, VP IT / Risk / Compliance

CISO

“You have been the best penetration testing firm we’ve used in nearly 20 years…”

CIO

“We really appreciate the partnership and will grow our relationship even further in 2025 and beyond.”

IS MANAGER

“They delivered what they promised, and beyond. Matt and his team are a pleasure to work with.”

IT MANAGER

“I can now sleep at night like a narcoleptic on NyQuil in a pillow factory, and we owe it all to them!”

DR MANAGER

“It is obvious that they are committed to providing an exceptional experience for their clients.”

IAM MANAGER

“Highly skilled and knowledgeable professionals who are experts in their fields”.

INTRODUCING THE SEVN

SEVN-X is built on SEVN distinct operational domains. We model these domains through the SEVN Knights of SEVN-X: a strategic framework that mirrors how our real-world teams operate, collaborate, and defend.

SHADE

Our adversary operations division. Elite hackers that, well... let's just say it's a good thing they're on our side.

ORACLE

Advisory services. Practical, pragmatic, actionable. See how easy that is to explain? That's how the Oracle delivers our strategic guidance too.

BASTION

Incident Response. When it hits the fan, we've got you covered. From response to rebuilding, Bastion can help right the ship.

AEGIS

The leader and manager of the SEVN knights. Aegis keeps all team operations efficient , on time & ethical.

ECHO

Forensic analysis. Neutral assessment of the data in question. Certified analysts. Certified results.

CIPHER

Need tools? He’s got them. Drama? We’ve got that too. Suffice to say our adversary ops team doesn’t exactly love Cipher’s tools.

PULSE

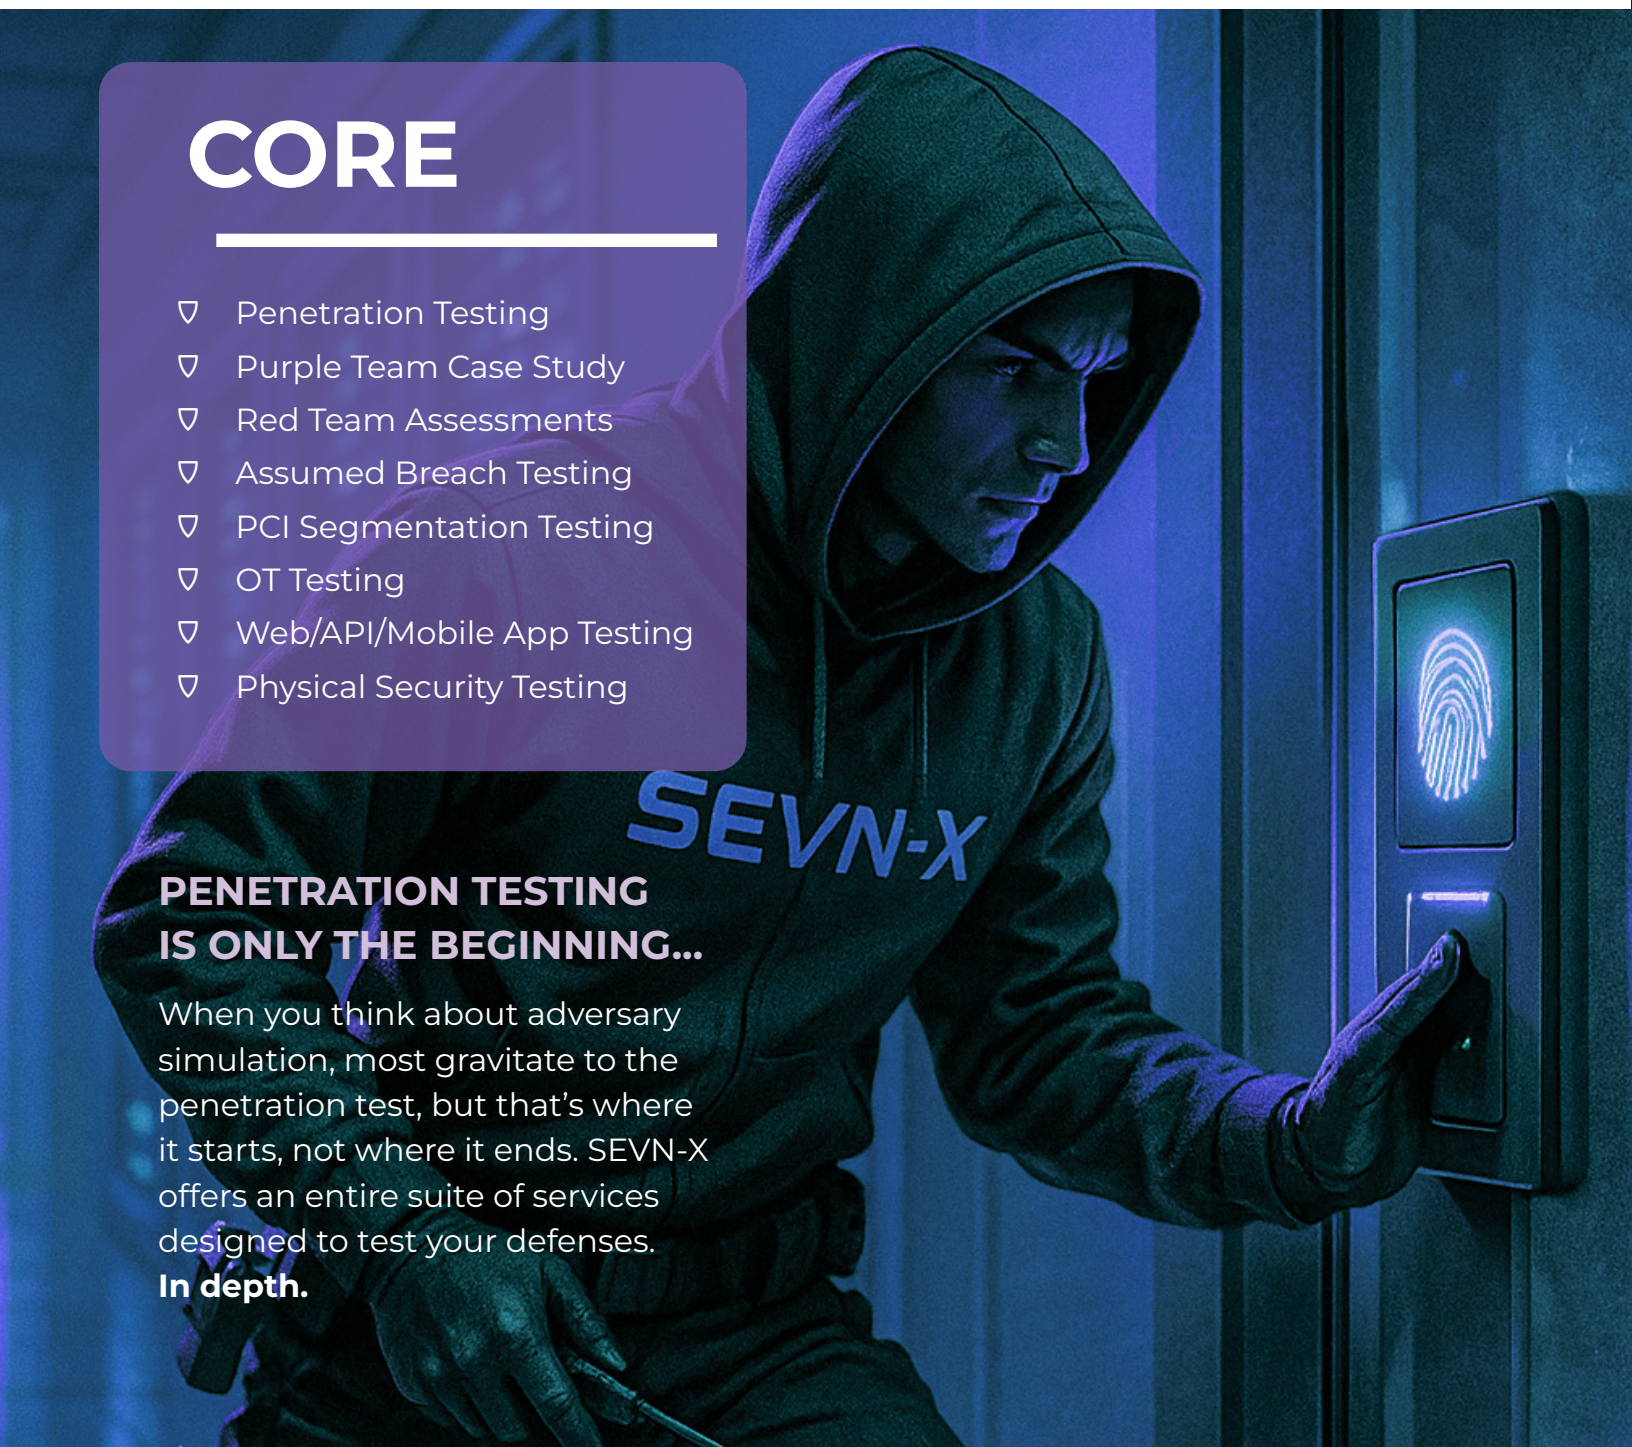
Application Security managed. From outsourced development to vibe coding, Pulse helps you keep a lid on the bug jar.

++

ADVERSARY OPERATIONS

You built it. We'll help you secure it.

We have the capability of modern attackers and the skill to safely assess your environment for threats and weaknesses in your people, processes, and technologies.



CORE

- Penetration Testing
- Purple Team Case Study
- Red Team Assessments
- Assumed Breach Testing
- PCI Segmentation Testing
- OT Testing
- Web/API/Mobile App Testing
- Physical Security Testing

PENETRATION TESTING IS ONLY THE BEGINNING...

When you think about adversary simulation, most gravitate to the penetration test, but that's where it starts, not where it ends. SEVN-X offers an entire suite of services designed to test your defenses. **In depth.**

ADVANCED TESTING OPERATIONS

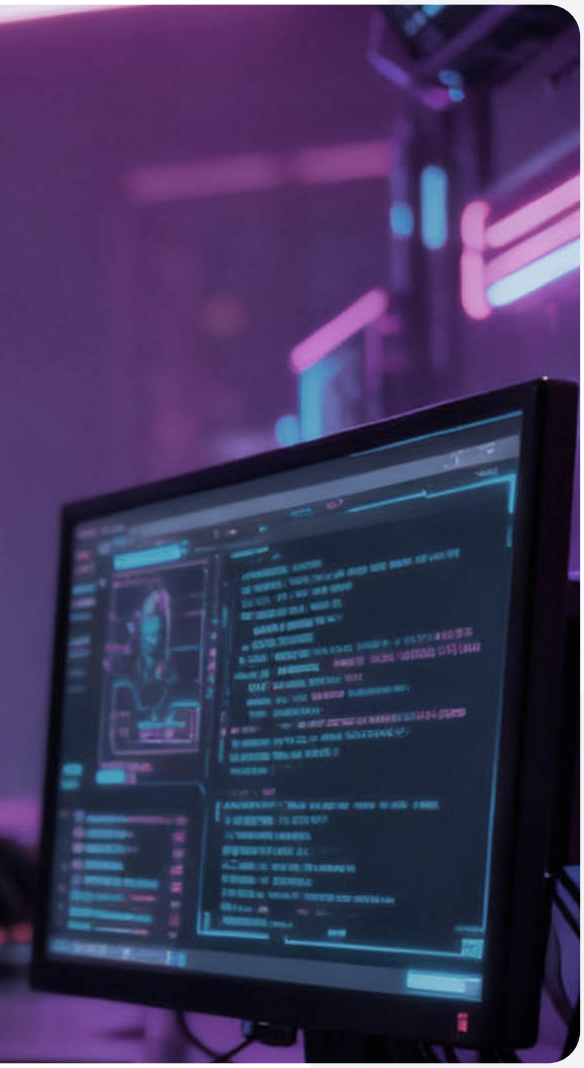
Ready for something stronger? Something custom? We've tailored assessments for numerous customers looking to achieve better cybersecurity. Tell our team what you're thinking. We'll get creative together.

++

THE OPERATORS

One thing that has plagued the cybersecurity industry for over a decade is a lack of standardization in testing—for both the assessment methodology and the operators. So, we fixed it.

THOSE THAT CAN, DO.



THE ~~HACKERS~~ HUMANS

We're certified. We're not just hackers, we're certified hackers. Our operators possess a combination of certifications including:

- Certified Red Team Operator
- Certified Red Team Professional
- Offsec Certified Professional
- Offsec Wireless Professional
- Offsec Certified Expert
- CISSP (Information Security)
- CCSP (Cloud Security)
- AWSCP (Cloud Practitioner)

THEIR ~~EXPLOITS~~ METHODS

We're consistent. From operator to operator, test to test, and client to client, SEVN-X offers repeatable, reliable, and consistent assessments to ensure you can benchmark your environment and measure progress over time. Our assessments align with leading published standards such as:

- MITRE ATT&CK
- NIST 800-115
- OWASP Top 10 & ASV
- CIS Device + Service Benchmarks

ONSITE VS REMOTE TESTING

We're onsite. When the engagement calls for it, we offer (and recommend) to come onsite for execution at no extra charge (save for expenses).

The value of being in-person to your team cannot be overstated.

++

STRATEGIC ADVISORY

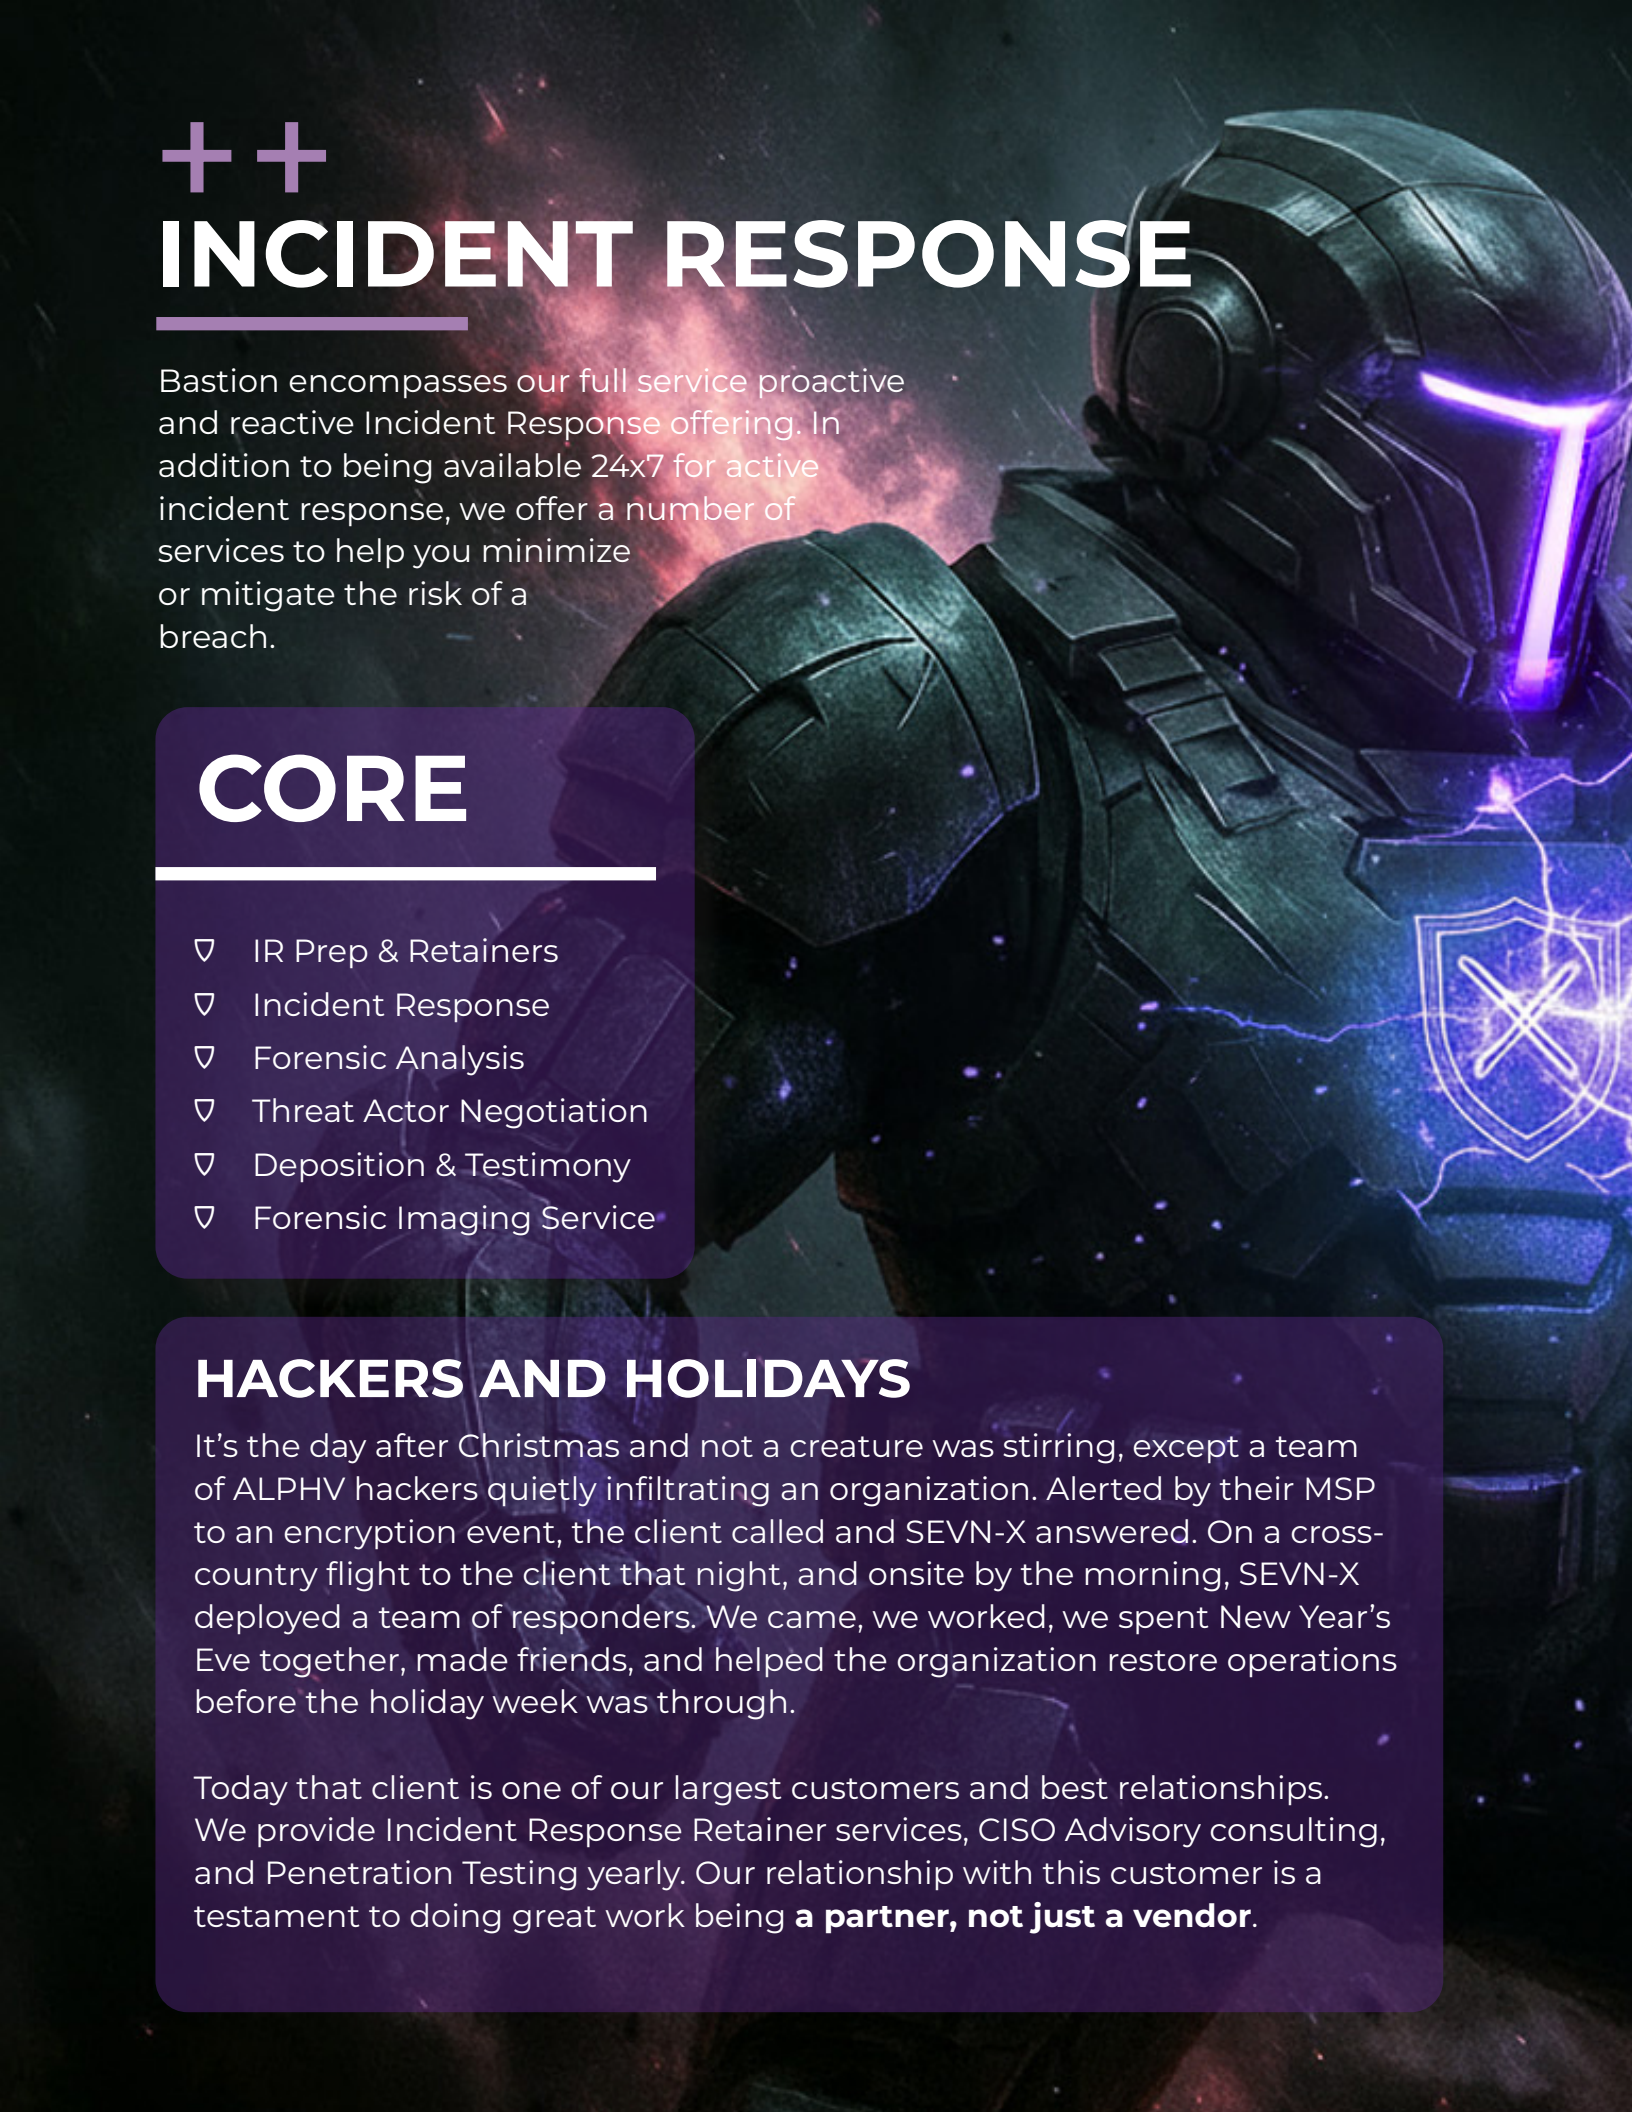
When you hear “cybersecurity,” most people think it’s a thing, we know it’s many things. We call it, the web of chaos. Our Advisory Team will help you restore order.
RISK MANAGEMENT
DATA LOSS PREVENTION



INCIDENT RESPONSE

Bastion encompasses our full service proactive and reactive Incident Response offering. In addition to being available 24x7 for active incident response, we offer a number of services to help you minimize or mitigate the risk of a breach.

CORE

- IR Prep & Retainers
- Incident Response
- Forensic Analysis
- Threat Actor Negotiation
- Deposition & Testimony
- Forensic Imaging Service

HACKERS AND HOLIDAYS

It's the day after Christmas and not a creature was stirring, except a team of ALPHV hackers quietly infiltrating an organization. Alerted by their MSP to an encryption event, the client called and SEVN-X answered. On a cross-country flight to the client that night, and onsite by the morning, SEVN-X deployed a team of responders. We came, we worked, we spent New Year's Eve together, made friends, and helped the organization restore operations before the holiday week was through.

Today that client is one of our largest customers and best relationships. We provide Incident Response Retainer services, CISO Advisory consulting, and Penetration Testing yearly. Our relationship with this customer is a testament to doing great work being **a partner, not just a vendor**.

BASTION

"When chaos strikes, I hold the line."

CODE NAME: BASTION

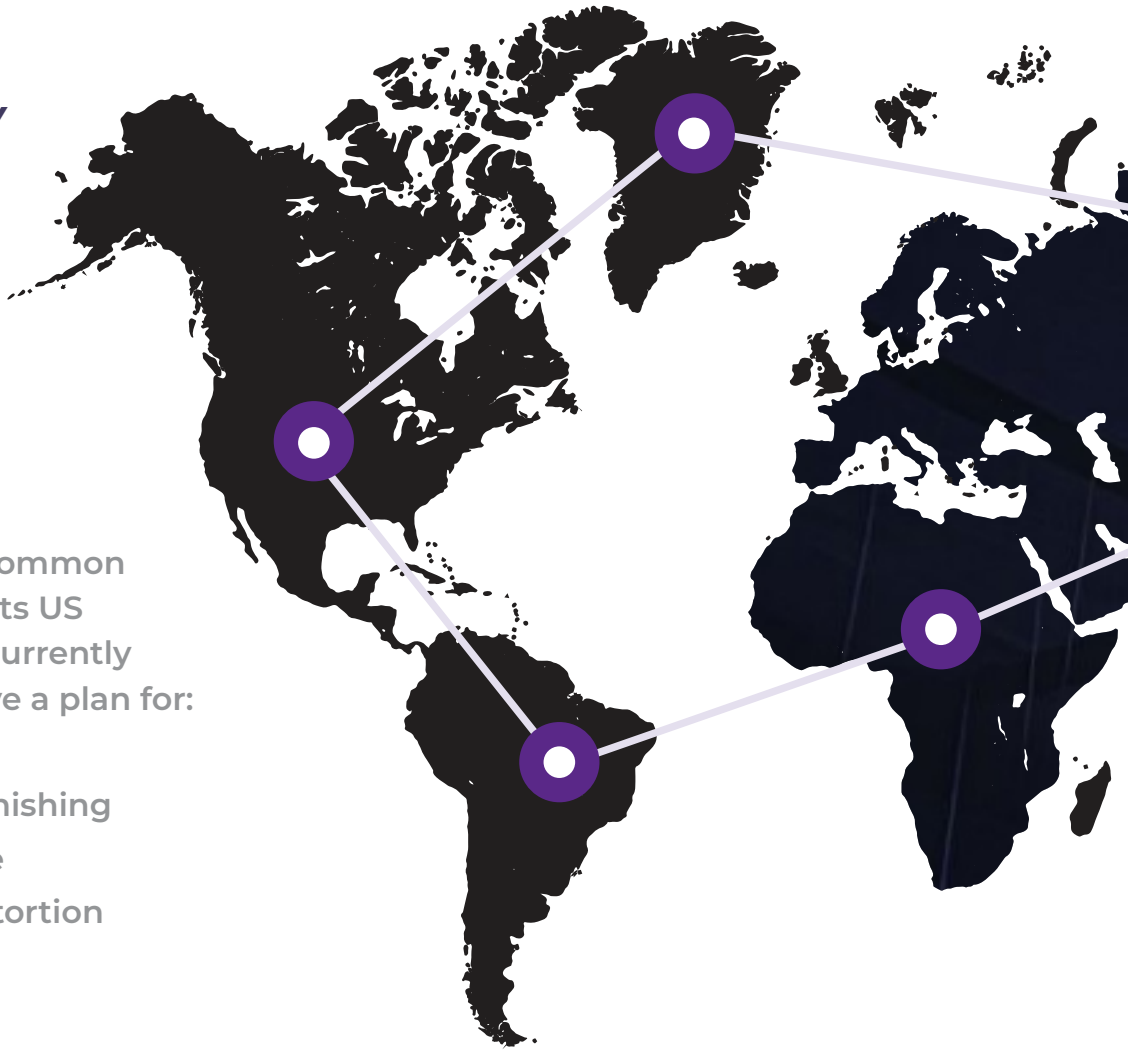
PERSONALITY: Stoic, loyal, first in first out!

ROLE: The Defender, the unyielding wall

++ INCIDENT RESPONSE

Global Capability. Sourced Locally. Our responders are based entirely in the United States. We've aided in incidents around the world but take pride in offering one of the few remaining truly domestic response teams.

KNOW THE THREATS YOU'RE LIKELY TO FACE



Do you know the common and trending threats US organizations are currently facing? Do you have a plan for:

- Ransomware
- Successful Phishing
- Deletionware
- Executive Extortion

MADE IN TH

EXPERIENCE MATTERS

SEVN-X has helped organizations successfully prepare for and prevent compromise, manage critical incidents, negotiate ransom demands, and work with legal counsel and insurance companies to deliver best-in-class Incident Response capabilities.

E USA.

PRE-INCIDENT

Be Prepared. Most breaches target the low-hanging fruit. Remember that expression, you don't have to outrun the bear, just your friends? Here's a few of our services that will give you the competitive edge:

- Incident Response Retainer
- Incident Response Plan Review
- Incident Playbook Development
- Tabletop Exercise Facilitation
- Attack Surface Management
- Vulnerability Management
- Threat Assessments

INCIDENT RESPONSE

We're here. 24x7. We're the team you need (and want) when an incident does occur. We offer a full battery of services to help you recover from an active incident quickly:

- Incident Coaching
- Host Triage and Forensic Analysis
- Threat Actor Negotiation
- 24x7 Monitoring
- Remediation Team Augmentation

POST INCIDENT

Learning. We often say, "Never let a crisis go to waste" and that means treating incidents as opportunities. We'll help you grow in the wake of an incident, from remediation to hardening exercises and procurement of detective and preventative control, we'll help ensure nothing happens twice.

CORE

- Intrusion Analysis
- Exfiltration Assessment
- M&A Due Diligence
- Threat Hunting
- Data Recovery
- Cloud Forensics

THE BIT WHISPERER

Buried amongst the ones and zeros are answers to questions such as: How did they get in? What did they take? What did they leave behind? Echo can help you find clarity in the chaos. Sifting through the bits, our certified forensic analysts have the tools, knowledge, and experience to help you find those answers.

CODE NAME: ECHO

PERSONALITY: Analytical, emotionally intelligent

ROLE: The truth finder, the voice of evidence

"EVERY BYTE TELLS A STORY."

++ DIGITAL FORENSICS

From corporate espionage to ransomware attacks, digital forensics has one focus: Find Answers. Putting a narrative to cyber events sheds light on what *has* happened and provides clarity on what needs to happen next.

STORY TIME...

I once worked on a case for a client that needed assistance with assessing the health of a potential acquisition. The prospective acquisition had little in the way of formal IT support and no dedicated cybersecurity personnel. As a result, details about the security of the organization were nebulous at best and negligent at worst.

Enter me, with my forensic tool belt, which included a state-of-the-art dynamic triage package collection tool that could be run on any host in the environment and in a just a few minutes, uncovered evidence of a potential dormant hacker. This assessment yielded eradication of a dormant threat and prevented the potential for lateral movement by postponing the establishment of a domain trust.

— *Echo*

ABOUT THE GCFA

GIAC CERTIFIED FORENSIC ANALYST

Widely regarded as the **Gold Standard** in forensic investigation, all of our analysts are GIAC certified to conduct forensic analysis/investigations, undergo frequent training, and maintain close contact with law enforcement, legal teams, and the insurance industry, as well as payment brokers and other resources you may need.

TOOLS THAT MATTER

WE ONLY WORK WITH THE BEST

You get what you pay for, or at least that's what Cipher's mom keeps telling us. But the *Magic Quadrant* means nothing if the tool doesn't perform.

We review and smoke test every product we offer, and we only partner with S-Tier companies that share our mission:
Precision without compromise.

CORE

- Endpoint Detection
- Managed Detection & Response
- Email Security
- Vulnerability Management
- ...and very select others

Cipher

Cipher is our gadget and tool specialist. He's obsessed with optimization and believes necessity is the mother of all invention. He won't just take any old tool off the shelf though. He is relentless, constantly testing, and only those that truly perform get to stay in his arsenal.

CODE NAME: CIPHER

PERSONALITY: Inventive, witty, always experimenting

ROLE: The builder, architect of systems and scripts

"GIVE PEOPLE BETTER TOOLS AND THEY'LL BUILD BETTER OUTCOMES"

VALUE ADDED RESELLING AS A NATURAL EVOLUTION.

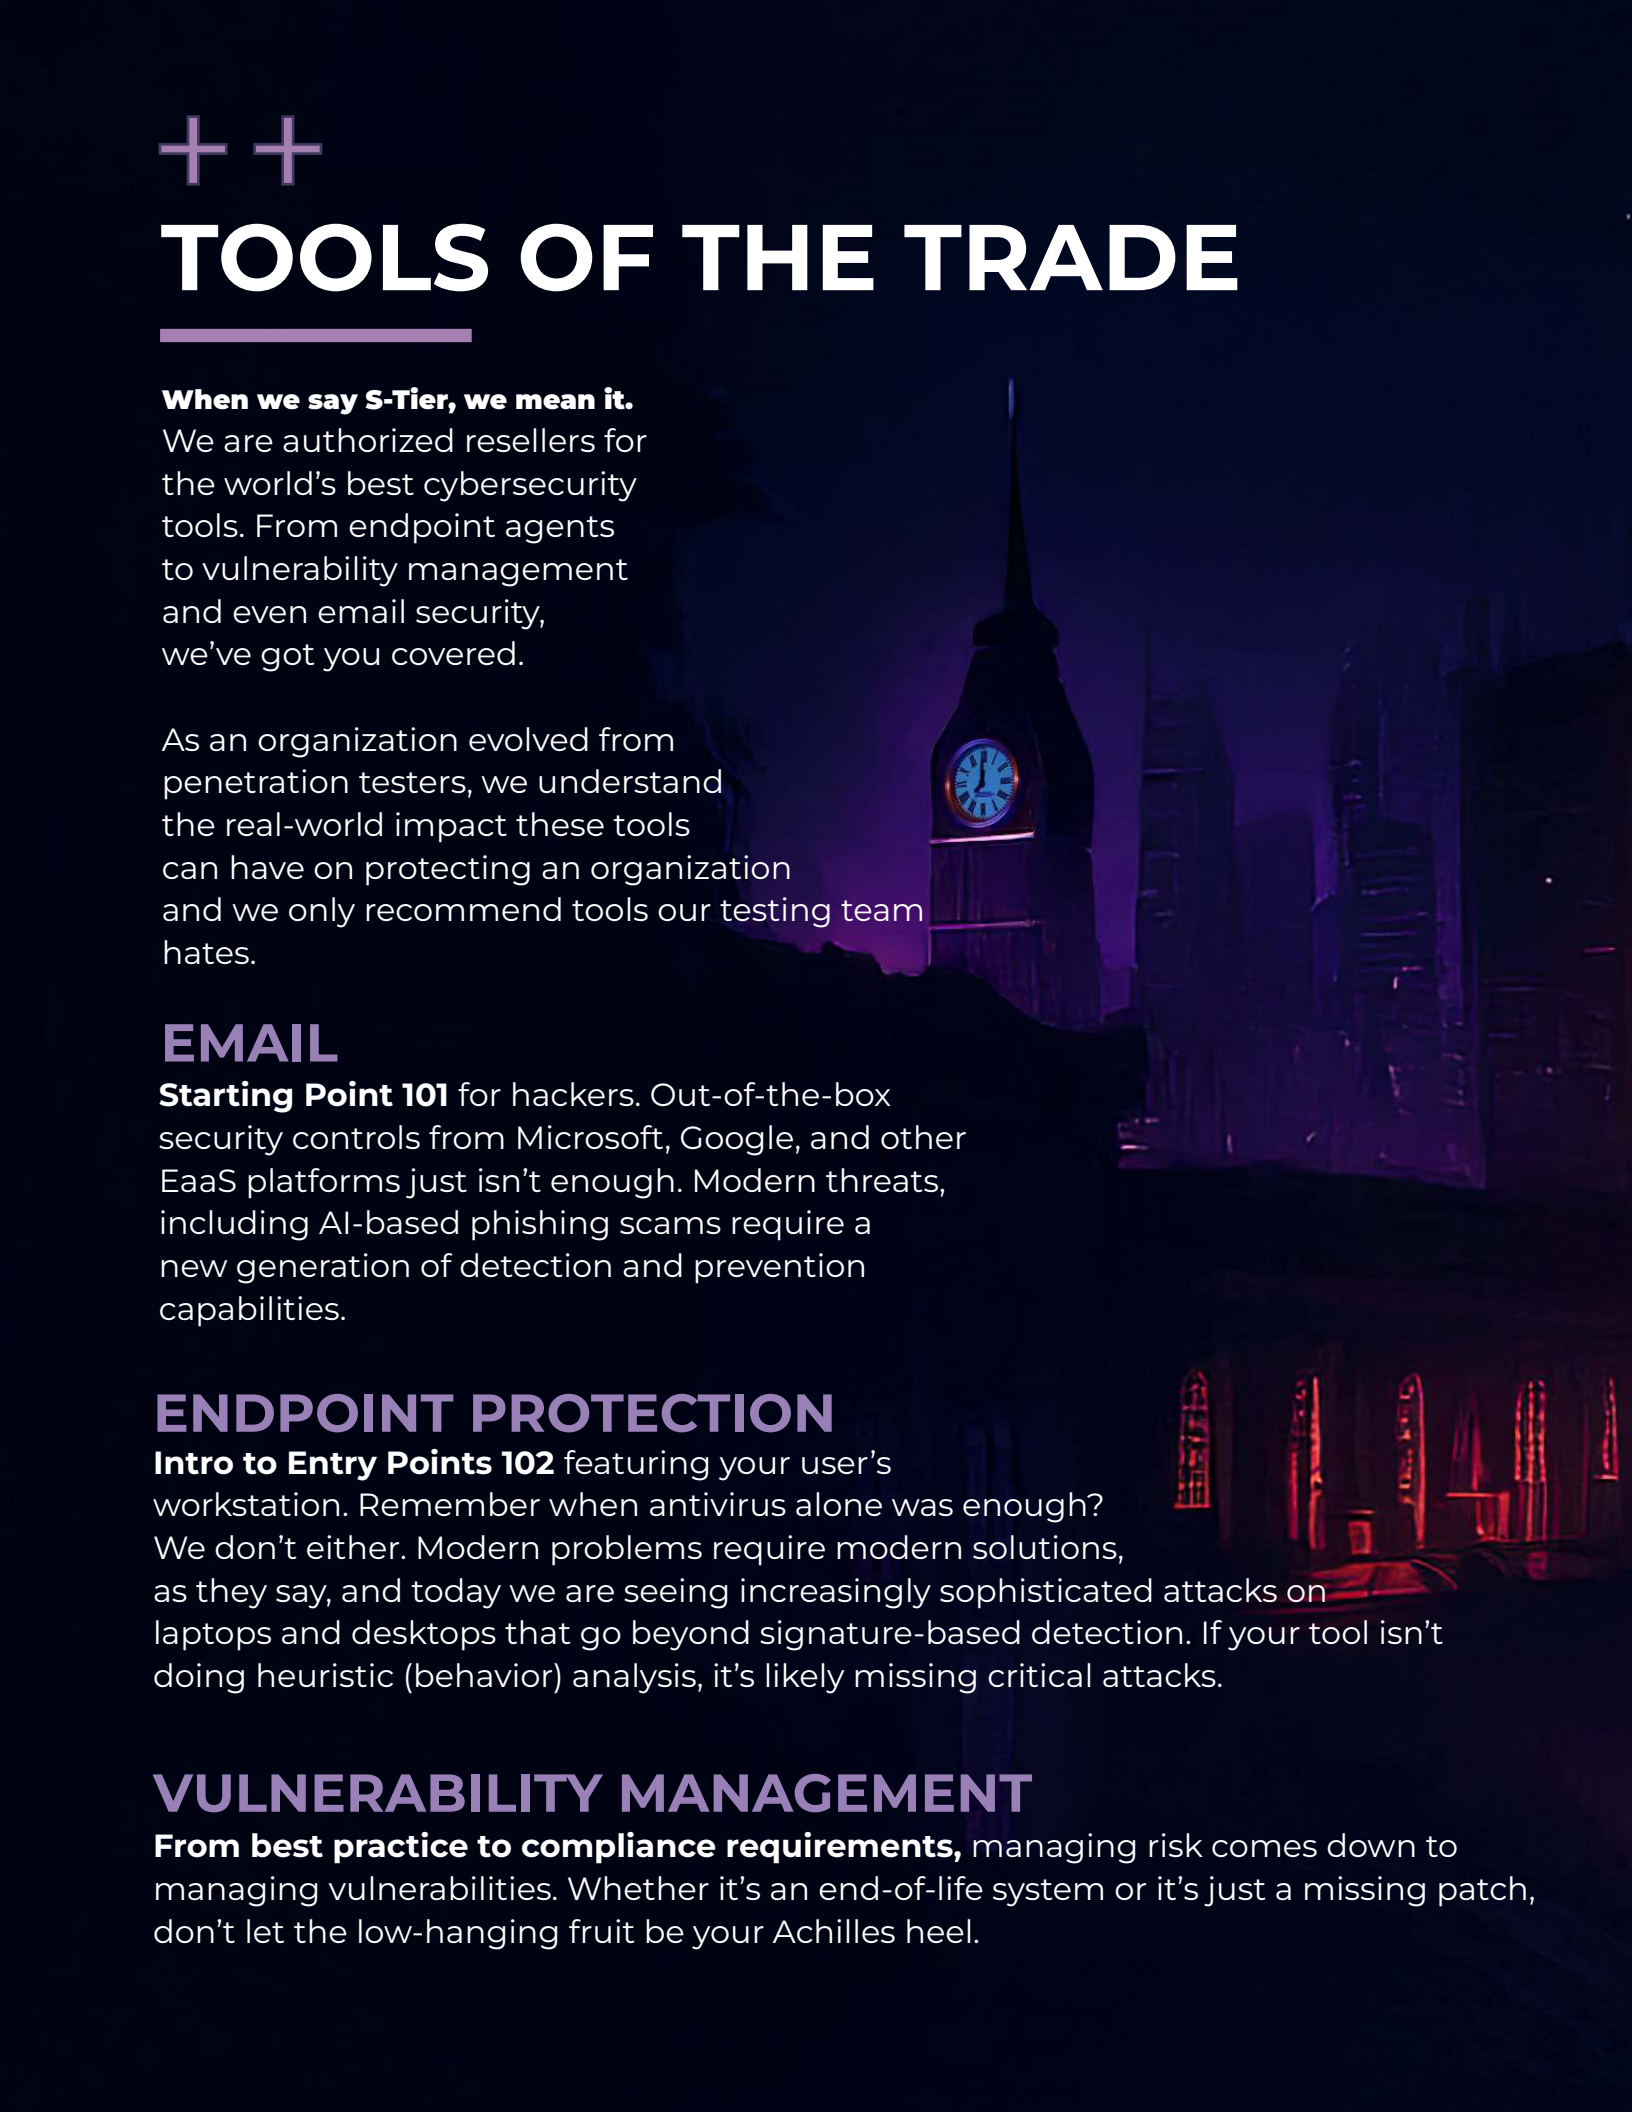
Penetration testing and other security assessments often identify gaps in visibility, detection, and prevention capabilities. We found ourselves recommending products, yet sending clients to purchase them elsewhere. **So we fixed it.**

++

TOOLS OF THE TRADE

When we say S-Tier, we mean it. We are authorized resellers for the world's best cybersecurity tools. From endpoint agents to vulnerability management and even email security, we've got you covered.

As an organization evolved from penetration testers, we understand the real-world impact these tools can have on protecting an organization and we only recommend tools our testing team hates.



EMAIL

Starting Point 101 for hackers. Out-of-the-box security controls from Microsoft, Google, and other EaaS platforms just isn't enough. Modern threats, including AI-based phishing scams require a new generation of detection and prevention capabilities.

ENDPOINT PROTECTION

Intro to Entry Points 102 featuring your user's workstation. Remember when antivirus alone was enough? We don't either. Modern problems require modern solutions, as they say, and today we are seeing increasingly sophisticated attacks on laptops and desktops that go beyond signature-based detection. If your tool isn't doing heuristic (behavior) analysis, it's likely missing critical attacks.

VULNERABILITY MANAGEMENT

From best practice to compliance requirements, managing risk comes down to managing vulnerabilities. Whether it's an end-of-life system or it's just a missing patch, don't let the low-hanging fruit be your Achilles heel.

CROWDSTRIKE
Sentinel One
Abnormal
RAPID7
tenable
Sublime Security

++ APPLICATION SECURITY

"YOUR CODE TELLS A STORY—
I'LL MAKE SURE IT'S NOT A TRAGEDY."

HOT TAKE: *SAST VS DAST*

Static Application Security Testing (SAST) analyzes code from the inside out, identifying vulnerabilities before the app runs. It excels at catching logic flaws, insecure patterns, and weaknesses early in development, reducing remediation cost and effort. ***However, it can generate noise and may miss issues that only appear during execution.***

Dynamic Application Security Testing (DAST) evaluates a running application from the outside in, simulating real-world attacks without requiring source code. It uncovers runtime-specific vulnerabilities, config issues, and exploitable behaviors. ***But it can't see underlying code logic and typically finds problems later in the lifecycle, when fixes are more expensive.***

EXCELLENCE IN PRODUCT & APPLICATION CYBERSECURITY

Commercial Product? In-house development? In/Out sourced? Current product or future dream? We've got you covered.

No matter your app sec needs, let SEVN-X help you **reduce exposure and maintain your customer trust.**

CORE

- SAST (Static Assessment)
- DAST (Dynamic Assessment)
- Program Maturity
- Secure Design Architecture
- DevSecOps Program Review
- Cloud Security Assessments

THE CLOUD. *DON'T LET YOUR PROD BECOME THEIR PLAYGROUND*

From mainframes to microservices, the cloud has seen almost ubiquitous adoption. But what about all those toggles and switches? What about security? We'll help make sure your prod doesn't become the hacker's dev.

CODE NAME: **PULSE**

PERSONALITY: **Analytical, precise & adaptive**

ROLE: **The Code Guardian, speaks fluent assembly**

++

PUTTING IT ALL TOGETHER

CYBERSECURITY. HANDLED.

AEGIS is the voice of the SEVN, thoughtful, powerful, and with dominion over the entire team. He ensures the team is meeting objectives and always exceeding expectations. Trust him and the rest of the SEVN to help you **Achieve Better Cybersecurity.**

Size won't dictate:

- Your Threats
- Your Adversaries

But it likely impacts:

- Your Response
- Your Capabilities

Let us help you be bigger than the threats.

CORE

- Security Leadership
- Tactical Assessments
